

product type designation

product description

PAT-Genius, object identification license for MV440

USB stick with PAT-Genius license

Pat-Genius; Object detection license for MV500 and MV400 code reading devices; single license, single license extends devices above with functionality for object detection and inspection; supplied on a USB stick; can be uploaded onto device via ALM; requirement: FW MV500 >V2.0 and MV440: FW >V6.0.

Technical Product Detail Page

<https://l.siemens.com/1P6GF3400-0SL03>

suitability for use

For detecting lenses with a camera

suitability for operation

runs on MV440

standards, specifications, approvals

reference code

- according to IEC 81346-2:2019

BYC

Security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
