product description

Figure similar

### PB M12 termination connector

M12 termination connector with pin insert, 5-pole, B-coded

M12 terminating connector for ET 200 with integrated terminating resistor combination for PB, Male contact insert, 1 pack=5 units.

Technical Product Detail Page

<https://i.siemens.com/1P6GK1905-0EC00>

suitability for use

As terminating plug-in connector with integrated terminating resistors for ET200 PRO

### transfer rate

transfer rate / with PROFIBUS 9.6 kbit/s ... 12 Mbit/s

### interfaces

number of electrical connections

- for network components or terminal equipment

1

type of electrical connection

- for network components or terminal equipment

M12 connector (male insert, 4-pin, B-coded)

type of electrical connection / FastConnect

No

### mechanical data

design of terminating resistor

Integrated resistor combination

material / of the enclosure

metal

locking mechanism design

Screwed joint

tightening torque / for M12 round connector / maximum

0.6 N·m

connector coding / of the M12 circular connector

B

### design, dimensions and weights

type of cable outlet 180° cable outlet

width 19 mm

height 19 mm

depth 73 mm

net weight 40 g

connectable cable cross-section 6 ... 8 mm

connectable conductor cross-section 0.33 mm<sup>2</sup>

### ambient conditions

ambient temperature

- during operation
- during storage
- during transport

-40 ... +70 °C

-40 ... +80 °C

-40 ... +80 °C

chemical resistance

- to water

resistant

protection class IP

IP65/67

### product features, product functions, product components / general

product feature

- silicon-free

Yes

<b>security information</b>	
security information	<p>Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit <a href="http://www.siemens.com/cybersecurity-industry">www.siemens.com/cybersecurity-industry</a>. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <a href="https://www.siemens.com/cert">https://www.siemens.com/cert</a>. (V4.7)</p>
