

product type designation

product description

Distance piece 20 mm MOBY D/ E, RF300

Spacer for establishing the necessary distance from the RFID tags to metal

MOBY D/E, RF300 spacer for MDS D100/MDS E600/611, RF360T, 20 mm; in connection with fixing lug 6GT2190-0AB00 (for metal-free room).

Technical Product Detail Page

<https://l.siemens.com/1P6GT2190-0AA00>

suitability for use

Can be secured using screws, rivets or cable ties

suitability for operation

for inserting a fixing lug 6GT2190-0AB00

mechanical data

material

PA 6

color

anthracite

ambient conditions

ambient temperature

- during operation -25 ... +75 °C
- during storage -40 ... +85 °C
- during transport -40 ... +85 °C

design, dimensions and weights

width

62 mm

height

24 mm

depth

110 mm

standards, specifications, approvals

reference code

- according to IEC 81346-2:2019 UAH

Security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit

www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
