software version

V2.13.0.0

**product functions**

product version

localization and communication server application for SIMATIC RTLS

product description

For position determination and tracking in localization system SIMATIC RTLS with license for 10000 transponders

product options

Server applications: Network Communication Service, Network Management Service, Localization Service, Client Communication Service / Administration tools: Network Configuration, Localization Configuration, User Configuration / Management and Visualization: System Management, 2D view / system requirement server: Microsoft Windows 2016/2019 Server, system requirement clients: Microsoft Windows 2016/2019 Server and Microsoft Windows 10 Pro 64-bit / system requirement database: Microsoft SQL Server 2017 / 2019, Oracle 18c / 19c / PostgreSQL 11.11 / 13.2, Microsoft SQL Server 2017 Express Edition included (only for evaluation, not for operation)

PROFINET conformity class

F

product function

- web-based management
- MIB support
- TRAPs via email
- configuration with STEP 7
- PROFINET IO diagnosis

<b>security information</b>	
security information	<p>Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit <a href="http://www.siemens.com/cybersecurity-industry">www.siemens.com/cybersecurity-industry</a>. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <a href="https://www.siemens.com/cert">https://www.siemens.com/cert</a>. (V4.7)</p>
