

product type designation

product description

Power cable for wide-range power supplies with US power supply plug

Flexible plug-i...16 connec001

SIMATIC RF600 Power supply cable for wide-range power unit for SIMATIC RF systems plug in US version

Technical Product Detail Page

<https://l.siemens.com/1P6GT2898-0AC21>

suitability for use

Plug-in cable for connecting the 6GT2898-0AC81 power supply unit to the supply system via US plug

cable designation

SVT, 18AWG X 3, 3 x 0,824

wire length

2 m

electrical data

number of electrical connections

2

operating voltage / maximum

125 V

mechanical data

number of electrical cores

3

type of electrical connection

NEMA 5-15P

material

- of cable sheath

PVC

marking / of cores

Color

color

- of cable sheath

Black

plug

type of plug interlock

Plugged-in / bolted

design of plug-in connection

US plug / Mini-Change® plug, female, 3-pin

security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or

network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
